Objectives

Senior Software Developer with 12+ years of experience designing and building enterprise-scale applications, automation solutions, and cloud-based systems. Currently working at Inspire Innovations, with deep expertise in Java, microservices architecture, and modern development practices. Known for strong problem-solving abilities, technical leadership, and delivering scalable, high-quality software that drives business impact.

Professional Experience

Senior Software Developer | Inspire Innovations *May 2025 – Present*

Design, develop and enhance a Medical Stop Loss (MSL) platform, enabling advanced RFP and RFQ management through a BPM engine. Implement AI-driven document processing to streamline quote intake, comparison, and selection, improving operational efficiency. Integrate risk scoring capabilities to support data-driven underwriting and decision-making. Contribute to scalable, secure microservices architecture and modern cloud-based deployments.

Skills: Java, Spring Boot, MyBatis, REST APIs, Spring Cloud, Spring Security (OAuth2), AWS (S3, SQS), Docker, Kubernetes, Angular, JWT, Maven, npm, Git, MariaDB, Azure DevOps.

Senior Java Software Developer - Team Lead | Poseidon IT Services *October 2024 – April 2025*

E-Barreau – Beirut Bar Association
Technical Lead / Full Stack Developer | December 2024 – April 2025

Developed an application from scratch for the Beirut Bar Association (BBA), enabling lawyers to register with the association and access BBA services. Integrated with BOB Finance to allow lawyers to create e-wallets, pay for subscribed/offered services, and handle renewal fees and insurance payments.

Project Design: Met with BBA officers to gather information and prepare the business requirements document. Created technical design documentation, defined the database structure, architected the backend services, and designed the frontend UI/UX.
Project Management: Translated requirements into well-defined tasks, developed the project plan, conducted sprint planning, monitored progress, resolved blockers, coordinated with QA to track bugs, and assigned issues to the appropriate developers.
Project Delivery: Delivered sprint-based releases that included completed features and bug fixes. Managed server setup at the client site and deployed the application with approved features by the agreed delivery date.

Document Management System (DMS)
Technical Lead | October 2024 – December 2024

Designing and developing new features in a Document Management System (DMS), enabling advanced file and folder permission management using the Alfresco engine. Integrating Camunda for workflow automation and OpenAI for document summarization, allowing users to initiate, track, and manage document processes efficiently. Optimizing security using technologies like Spring Security, OAuth2, and Keycloak.

Skills: Java Spring Boot, JPA, REST API, OpenAI, Spring Cloud, Spring OAuth2, Keycloak, Docker, nginx server, OpenAPI, React.js, JWT, EHCache, Redis, Gradle, npm, yarn, Git, MariaDB, Azure DevOps.

Senior Software Engineer - Technical Leadership | NEXtCARE - Allianz Partners
July 2016 – September 2024

Automated Engine for Adjudication
Technical Lead / Senior Java Software Developer | Jan 2018 – October 2024

Developed modules in an Automation Engine to adjudicate requests submitted from Hospitals to Insurance companies. Automating 80% of the requests to be routed without human intervention, covering more than 10 countries and handling at least 500,000 transactions per day.

Led an outsourcing team to migrate solutions from legacy technologies to modern platforms and microservices. Integrated CI/CD DevOps pipelines and automated deployment using batch scripting. Implemented certificate-based authentication (PFX certificates) for secure communication between services. Played a key role in integrating existing modules with the engine and supported other teams in understanding its functionality, enabling them to extend automation capabilities across systems.
Provided Technical Guidance: Developed an auto-detection solution for bugs that compares legacy and new system responses, alerting on discrepancies.
Mentored and Supported junior developers, fostering professional growth, assigning tasks, and reviewing code.

MyNEXtCARE – Mobile Application
Mobile Developer / Full Stack Developer | July 2016 – Jan 2018

Developed mobile applications using the Cordova framework and Webservice in .NET framework.
Full Stack for Mobile and Web Applications: Enhanced UI/UX practices, Managed app bundle/APK generation.

Skills: Java Spring Boot, JPA, REST API, MVC, Angular, JUnit Test, JSON Web Tokens (JWT), EHCache, Gradle, Jenkins, Docker, Grafana, Nexus, Drools, JMeter, Cordova, ONSEN UI, NodeJS, Batch Script ,npm, Git, Linux, PL/SQL, PostgreSQL, and Oracle Database.

Software Developer | Cedar IT Services **September 2014 – July 2016**

Developed a web application for banking system. Migrating the CDR (Central de Risk) application of the BDL (Bank du Liban) using JSF framework.

Developed and delivered an efficient and reusable code, optimized screen responsivity, and configured database servers, Bonobo, Git, and WebSphere on Linux environments.
Skills: JavaEE, JSF, ICEfaces, Hibernate, Spring, Maven, WebSphere, Bootstrap, Oracle Database, IBM DB2.

Personal Projects

Websites:

- **JSON Compare**: An online tool for comparing JSON data with customizable options. Built using **React.js** for the frontend and **Java Spring Boot** for the backend. Explore it at https://jsoncomparator.netlify.app/

- Online Computer Sales Project: Developed an ASP.NET framework (C#/VB.net) website enabling users to search for computers and compare PCs, and place orders.

Education

Computer and Communication Engineering (CCE) - Islamic University of Lebanon **Aug. 2014**

Thesis: Prepaid Electric Meter - Integrated software and hardware components. Developed an **Android app** for payment transactions and designed an electronic circuit to monitor consumption and communicate via **NFC**. (.NET Web Services and SQL Server database).

Lebanese Baccalaureate II –SV - Hussein Ali Nasser High School **Aug. 2009**

Certifications:

CISCO CCNA Exploration LAN Switching and Wireless **October 2013**
CISCO CCNA Exploration Routing Protocols and Concepts **March 2013**
CISCO CCNA Exploration Network Fundamentals **October 2012**

Languages

Arabic: native language **French**: Excellent **English**: Good

Other Skills

- **Management and Communication Skills:** Experienced in Agile methodology and Sprint planning, with a proven track record of leading a team for the last 6 years.
- **Technical Skills:** Interest and experience in designing Electronics circuits, Robotics and Home Automation. Developed smart home devices for personal use. Also I have wide knowledge in the following work-related technical skills:
  - **Workflow and Reporting:** JPBM, TIBCO Jaspersoft (Java Reporting)
  - **DevOps and Containerization:** experienced in Kubernetes Azure-DevOps, Jenkins and Docker**.**
  - **Web Development:** OpenAI, React.js, JavaScript, TypeScript, Angular, REST API, CSS3, HTML5, .NET Core
  - **Development Tools:** Eclipse, VisulaStudio, XCode, Visula Studio Code, IntelliJ.
  - **Version Control Systems:** GIT, SVN, VSS (Microsoft Visual SourceSafe)
  - **Analytics Tools:** Google Analytics, Google Tag Manager for tracking and data analysis.

    - **Database Management and Scripting:** PL/SQL, Oracle databases, DB2, MySQL, PostgreSQL, MariaDB, focusing on procedures, functions, triggers, and jobs.
- **Self-learner:** I try to keep myself updated with the latest technologies. I invest my time browsing through various lectures on the Web Code Geeks and websites such as javacodegeeks.com, cordova.apache.org and linkedIn/learning.
